THE HEALTHY SOLUTION TO WEIGHT-LOSS

PROPRIETARY BLEND

Fat Burner/Thermogenic/Metabolic Accelerator

A combination of powerful Fruit Extracts, exhibiting thermogenic effects with the ability to increase resting metabolic rate. This metabolism increase makes the body burn fat at a faster rate than normal, which is effective for weight loss.

DIRECTIONS FOR USE

Take **2 capsules 30 minutes before breakfast** & 1 capsule 30 minutes before lunch with a full glass of water.

90 CAPSULES PER BOTTLE

BENEFITS

- **Increases Metabolic Rate**
- **Appetite Suppressant**
- **Energy Enhancer**
- **Thermogenic**
- **Fat Burner**

GREEN TEA EXTRACT

KOLA NUT EXTRACT

GREEN TEA EXTRACT

Fat Burner/Metabolic accelerator/Increases Fat Excretion

Epigallocatechin Gallate (EGCG), a compound found in green tea increases fat oxidation by 33%. Green Tea, by means of the EGCG compound not only increases metabolism, as well as fat oxidation but also inhibits fat cell development and increases fat excretion.

GUARANA EXTRACT

Fat Burner/Appetite Suppressant/Detoxify Colon

Guarana supports weight loss by providing stimulation and combating hunger. It kick starts the nervous system to induce the process of lipolysis. This process involves the release of fat into the blood stream where it is used as energy during the day. Guarana encourages movement of the bowels, as well as helps to detoxify and cleanse the system.

KOLA NUT EXTRACT

Appetite Suppressant

Kola Nut aids as an effective appetite suppressant, as well as a metabolic accelerator and an energy enhancer.

WHITE KIDNEY BEAN EXTRACT

Carbohydrate-Blocking Effect

White bean extract aids weight loss as the beans produce substances that interfere with an enzyme called amylase that is necessary for the breakdown of carbohydrates, which are one of the main sources of calories in many diets. If carbohydrates aren't broken down into small enough units, your body can't absorb them and can't make use of the calories they provide.

WHITE KIDNEY BEAN EXTRACT

Activ8

METABOLIC ACTIVATOR

DROPS 4 WEIGHT-LOSS

Cherry flavoured concentrated W8Loss drops, designed to **boost metabolism** while **suppressing your appetite**.

The unique W8Loss blend of **natural ingredients** that creates a **powerful formula**, aiding in **reducing appetite**, **increasing metabolism** to promote weight-loss & the **fat burning process**.

ACTIV8 BENEFITS

- *Fat burner*
- *Decrease water retention*
- *Increase metabolic rate*
- *Reduce appetite*
- *Energy booster*
- *Detox*

THE HEALTHY SOLUTION TO WEIGHT-LOSS

PROPRIETARY BLEND

W8loss drops are designed to help boost metabolism while suppressing your appetite. This is achieved by increasing serotonin levels in your brain. Serotonin levels have an impact on hunger and low levels are linked to overeating.

DIRECTIONS FOR USE

Use 10-15 drops in a 250 ml glass of water, 2 - 3 times daily 30 mins before meals. Best used in conjunction with the W8loss capsules. 50ml PER BOTTLE

ACTIV8 INGREDIENTS

GARCINIA CAMBOGIA (HCA 60%)

The active ingredient, hydroxycitric acid (HCA), accelerates fat-burning while reducing appetite. It blocks an enzyme called citrate lyase, which your body uses to make fat. It also raises levels of the brain chemical serotonin, which may make you feel less hungry.

FORSKOLIN EXTRACT

Extracted from the plant *Coleus forskohlii* (alternatively known as *Plectranthus barbatus*), forskolin is a chemical compound that's been found to have a positive impact on body composition, decreasing body fat percentage and fat mass. It not only promotes weight loss but it may help prevent weight gain. Forskolin aids in stabilising blood sugar levels. It has the ability to activate CAMP accumulation.

What is CAMP? CAMP is a "second messenger" impacting various biological processes. These second messengers are responsible for helping cells understand how to process the messages of various "first messengers," like endorphins and hormones including epinephrine or serotonin. The activation of CAMP is important because CAMP helps regulate blood glucose and fat metabolism levels.

DANDELION EXTRACT

The taraxinic acid found in dandelion leaves are responsible for the diuretic property of the herb, as well as some of its detoxifying effects.

GREEN TEA EXTRACT

Green tea extract raises your metabolic rate, so you burn more calories

POTASSIUM

Potassium helps boost metabolism and energy, giving your body components necessary to provide energy for physical activity by aiding in its use of metabolism-boosting nutrients, including iron, magnesium and calcium.

Potassium combines with magnesium to aid in muscle contraction, control and growth. Bigger, stronger muscles burn more calories. Potassium is an electrolyte that prevents excess fluid retention by combining with sodium to help regulate fluids around your cells.
